The statement of Dr. Ellot, the distinguished ex-president of Harvard University, or of Judge Alton B. Parker, are almost identical with Col. Roosevelt's. All of them contemplate a Federal system of which Ireland would form a single but a strictly subordinate unit. They see no difficulty about it, because in their very different circumstances they have had no difficulty themselves.

"If the Irish fail to do this quickly they simply risk the imposition of a form of government which will satisfy nobody. We do not go so far as to say that any Irish settlement is better than no settlement, but we are convinced that neither Englishmen nor the empire at large will tolerate continuance of this mischlevous unrest."

NE of the first places where the people of the United States are going to feel the effect of this nation's entry into the war is in increased food costs.

This is inevitable. No matter who you are or where you live, you are going to feel it-unless you do something about it right away. What can you do, and how shall you do it? Every man and woman who has room in his yard or who can get the use of a vacant lot near his home to start a garden should think and act right now.

You to whom this idea is new will be surprised to know that the yield from even a small plot of ground will produce enough vegetables to feed a family of five all summer. Figure this out in dollars and cents and you will be surprised at the amount of money a small garden will save you in a single season. Invest the cost of necessary seeds and the small amount of labor required and you will be delighted at the additional goodness you will enjoy in fresh garden truck picked right out of your own patch. Try this plan, beginning now-this month is planting time, and you will find that you will be distinctly benefited physically-yes, and mentally, too-by the wholesome outdoor work of pottering around in the ground among growing things.

And right here is where you will find the new Encyclopaedia Britannica of immense practical value.

Order your Britannica NOW or you can NEVER buy it.

Are you surprised at the idea that the Britannica can be of immediate help in such an ordinary undertaking as a garden?

The Encyclopaedia Britannica covers the whole range of agricultural subjects completely from the very foundation of a thorough knowledge of gardening and extending over the widest field.

It will tell you what kind of ground each crop needs. It will tell you how to prepare the ground, how far apart to plant the rows of seeds, when to plant, how to cultivate the ground while things are growing, and it even gives the names of reliable varieties of seeds.

The Britannica describes local crops and any local methods of farming that are of special interest. It contains some 600 articles on individual plants.

The article "Soil" (Vol. 25, p. 345) tells how to make the best quality of soil. The article Manures and Manuring tells about fertilizing. the supplying of ingredients the soil needs to make it most fertile. There are articles on Bacteriology, the effects of Sunlight, Shade, Heat, Cold, Water enough. Drainage, Irrigation, Reclamation of waste land.

There is an article that tells how to fight all kinds of pests from bug and the like to the larger enemies like the rabbit. It is safe to say that any amateur gardener with the help

Prepare NOW for War-Time Food Prices

and instruction to be found in the Britannica can multiply his chances of success and the yield from his patch many, many times.

Think of this matter of food supply seriously. It will become very serious if the war runs on.

Every farmer of a dozen acres or many hundreds of acres, growing such staples as wheat, barley, corn, rye, hay, cotton, etc., will be called upon to increase the yield and reliability of his crops. The farmers of big farms will find in the Britannica articles full of information and help to them, for the agricultural articles and articles on correlated subjects are written by agricultural experts of world-renown.

The Britannica is the highest authority in the world for information on all farming subjects, including live stock and the animal industry

If you have room for poultry, the Britannica articles on Poultry and Poultry Farming will help you to make this a successful economic side line.

Bee keeping and the honey industry is a method of food production that is interesting and practically without expense. People who live in apartment houses in the cities, miles from the country, have kept bees on their roofs successfully and profitably. The Britannica articles

on the Bee (Vol. 3, p. 625) and Honey (Vol. 13, p. 776) are complete and instructive.
